Luca Coccia

Palestrina, Italy
lucaccc01@gmail.com github.com/lucaccc1

Computer Engineering undergraduate transitioning to advanced studies in Artificial Intelligence and Applied Computer Science. Passionate about bridging theoretical AI concepts with practical software development to build intelligent solutions.

Education

Sapienza Universita di Roma **Sep 2023 – Oct 2026**
Bachelor of Science in Computer Engineering *Rome, Italy*

- **Thesis:** Evaluation of LLMs for the automatic description of functions during static analysis of stripped binaries.

Sapienza Universita di Roma **Sept 2026 –**
Master of Engineering in Computer Science and Artificial Intelligence *Rome, Italy*

Relevant Coursework

- Software Engineering
- Operating Systems
- AI Fundamentals
- Web Technologies
- Algorithms
- Data Structures

Experience

Sapienza Universita di Roma **Mar 2026 – Jun 2026**
Undergraduate Research Intern *Rome, Italy*

- Conducted academic research on AI-assisted reverse engineering, independently defining the project scope and methodology under faculty supervision.
- Designed comprehensive evaluation frameworks and custom quantitative metrics to assess LLM reasoning capabilities on assembly code.

Servizio Civile Universale **Jul 2024 – Jul 2025**
Volunteer *Palestrina, Italy*

- Supported local community projects, demonstrating strong teamwork, communication, and organizational skills.

Projects

LLM Evaluation for Static Analysis Tool | *Python, IDA Pro, Bash* **Mar 2026 – Jun 2026**

- Engineered a headless tool to automatically assign descriptive names to functions in stripped binaries, cutting down the bottleneck in static analysis.
- Developed a custom technical bridge between IDA Pro and Python to extract binary data and seamlessly interface with Large Language Models.
- Evaluated the performance and accuracy of various LLMs in understanding and summarizing assembly-level code.

Rinnemon | *React, Node.js, JavaScript, HTML/CSS* **Mar 2026 – Present**

- Designed and developed a fully playable roguelike web game inspired by Pokemon mechanics, optimized specifically for PC browser experiences.
- Implemented interactive front-end mechanics and game state logic utilizing modern React hooks and Node.js.

Technical Skills

Languages: Python, C, Java, JavaScript, HTML/CSS
Frameworks & Libraries: React, Node.js, Pandas
Developer Tools: Git, Linux, IDA Pro, LaTeX
Databases: PostgreSQL
Spoken Languages: Italian (Native), English (B2)

Leadership & Teaching

Freelance STEM Tutor **2023 – Present**
Private Tutor *Palestrina, Italy*

- Mentored high school students in STEM subjects (Mathematics, Computer Science, Physics).
- Simplified complex technical concepts into accessible lessons, improving students' problem-solving skills and academic performance.
